Subject Index

Adsorption,
of fluorescent dyes on macromolecules, 247
of polymer chain on a surface, 305
Biological morphology and macromolecular systems, 331
Butyl methacrylate oligomers, interactions of, with solvents, 219
Calorimetry,
heat of dissociation of maleic acid-butyl vinyl ether copolymer, 241
heat of mixing of butyl methacrylate oligomers with solvent, 219
Cellulose derivatives, light scattering from concentrated solutions of, 123
Copolymers,
of L-methionine and S-ethyl-L-cysteine, conformation of, 199
of methyl methacrylate, light scattering and viscosity of, 145
of polystyrene and methyl methacrylate, light scattering from concentrated solutions of, 123
of vinylacetochloride, effect of method of dissolution on intrinsic viscosity of, 191
of vinyl pyrrolidone and methyl methacrylate, intrinsic viscosities of, 159
segregation in AB block copolymer, 133
thermodynamic theory of solutions of, 43
Critical point, calculation of, 43, 71
Crosslinked polymers,
selective sorption of solvents by, 169
thermodynamics of solutions of, 83
Excluded volume effect,
in adsorption of polymer chain on a surface, 305
in block segregation in AB block copolymer, 133
Fluorescence of polymer-dye solutions, 247
Gas-liquid chromatography,
investigation of solution thermodynamics by, 273
Hydrocarbons,
thermodynamics and molecular interactions of, 11
thermodynamics of alkane solutions from gas-liquid chromatography, 273
Infrared spectra of polypeptides, 199, 211
Light scattering in solutions,
of concentrated polydisperse polymers, 281
of methyl methacrylate random copolymers, 145
of moderately concentrated polymers, 123
of poly (2,6-dimethyl-1,4-phenylene oxide), 311
of polymer-dye adsorption complexes, 247
of polypeptides, 199
Maleic acid-butyl vinyl ether copolymer, heat of dissociation of, 241
Methyl methacrylate copolymers, light scattering and viscosity of, 145
Microphase separation, significance of, in biological organization, 331
Molecular conformation of polypeptide polymers and copolymers, 199
Molecular dimensions,
of methyl methacrylate copolymers in acetone, 145
of polyarylates, 113
of polymer-dye adsorption complexes, 247
of vinyl pyrrolidone-methyl methacrylate copolymers, 159
Molecular interactions,
in polymer-dye solutions, 247
in poly(vinyl chloride) solutions, 107
of nonpolar molecules, 11
Molecular structural transitions in polypeptide solutions, 211
Morphology, biological, in relation to macromolecular systems, 331
Network formation in concentrated polymer solutions, 123
Nuclear magnetic resonance in the

ternary system CCl_4-poly(methyl methacrylate)-benzene, 325
Nucleic acids, interactions of, in density gradient sedimentation, 293
Optical activity,
of nicotine salts of poly(methacrylic acid), 265
of polypeptides, 199
Phase equilibria, theory of liquid-vapor, in normal alkanes, 1
Phase separation in polymer solutions, 311
Polyarylates, molecular dimensions and viscosities of, 113
Poly(2,6-dimethyl-1,4-phenylene oxide), phase separation in toluene solutions of, 311
Polyelectrolytes,
chemical potentials in protein-salt solutions, 179
heat of dissociation maleic acid-butyl vinyl ether copolymer, 241
optical activity of nicotine salts of poly(methacrylic acid), 265
Polyisobutylene, entropy of mixing with cyclohexane, 35
Poly(methacrylic acid), optical activity of nicotine salts of, 265
Poly(methyl methacrylate), solvation of, in ternary system with CCl_4 and benzene, 325
Polypeptide homopolymers and copolymers, conformation of, 199
Polypeptides, infrared spectra and molecular transitions in solutions of, 211
Polysaccharides, interactions of, in density gradient sedimentation, 293
Polystyrene,
light scattering in concentrated solutions of, 123, 281
thermodynamics of solutions of, 43, 71
Poly(vinyl alcohol), sorption of solvent by gels of, 169
Poly(vinyl chloride), chlorinated, solubility parameters of, 107
Poly(vinyl pyrrolidone), interaction of fluorescent dyes with, 247
Protein solutions, chemical potentials of salts in, 179
Second virial coefficient, 1, 71, 113, 145, 247
Sedimentation equilibria of biological macromolecules in density gradients, 293
Solubility parameters of chlorinated poly(vinyl chloride), 107
Solvation equilibrium in the ternary system CCl_4-poly(methyl methacrylate)-benzene, 325
Statistical theory,
for adsorption of polymer chain at a boundary, 305
for block segregation in AB block copolymer, 133
Swelling of crosslinked poly(vinyl alcohol) gels, 169
Thermodynamics,
activity coefficients of ions in protein-salt solutions, 179
gas-liquid chromatography in investigation of, 273
heat of dissociation of maleic acid-butyl vinyl ether copolymer, 241
limiting critical point and theta temperature in binary polymer solutions, 71
of copolymer solutions, 43
of crosslinked polymer solutions, 83
of interaction of nonpolar molecules, 11
of liquid-liquid phase separation in polymer solutions, 311
of polymer-solvent interactions, 219
of vapor-liquid equilibria in normal alkanes, 1
theory for entropy of mixing of polymer and solvent, 35
Ultraviolet spectra of polypeptides, 199
Vinylacetochloride copolymers, effect of method of dissolution on intrinsic viscosity of, 191
Vinyl pyrrolidone–methyl methacrylate copolymers, viscosities of, 159
Viscosity,
of chlorinated poly(vinyl chloride) solutions, 107
of copolymers of vinyl pyrrolidone and methyl methacrylate, 159
of methyl methacrylate copolymers in acetone, 145
of polyarylates, 113
of polymer solutions containing fluorescent dyes, 247
of polypeptides, 199
of vinylacetochloride copolymers, effect of method of dissolution on, 191
